Description:
 Bike Boulevards (\$516,000). This project funds operational and capital improvements necessary to develop an additional 15 miles of bicycle boulevards. Projects were identified with the assistance of Portland's Bicycle Advisory Committee. Streets were selected due to favorable conditions (low speeds, low volumes and existing diverters), effective connectivity to the existing bicycle network, and family friendly access to neighborhood destinations. Project elements will include traffic calming, crossing improvements, signage and pavement markings. The Bureau of Transportation is working to identify local, state, or federal revenues to fund this project.

Expected Results:
